HIAVA AUDIBLE AND VISUAL REPEAT FIRE ALARM UNIT

The ITIM Systems HIAVA - is a High Intensity Audible and Visual Fire Alarm Unit intended for installation in larger engine rooms or those with a high noise level. It consists of a 105dB Audible Alarm screamer and four arrays of Flashing ultrabright LEDs mounted into the lid of a surface mount enclosure Measuring 90 x 160 x 85 mm high.

**Remote alarm switching power into Hiava unit
will operate audible & visual alarms.
Power supply can be either 12 or 24 vdc,
Typical current draw = 200mA average to peak 400mA
Power supply wiring terminates on two PCB
mounted terminals within the enclosure.
Labeled as B+ in, and B- in.**

Made with Pride in Australia
